M3 TECHNOLOGY

TECHNOLOGY

SUPPLY CHAIN & INVENTORY MANAGEMENT SERVICES

A woman-owned small business, M3 Technology has developed its experience with fixed and rotary wing aircraft and other platforms through direct program management of operations in support of prime contractors, leading manufacturers, airlines, the US Government and its allies around the world. In fulfillment of these requirements, M3 Technology has supported aircraft in service all over the globe, along with direct production and maintenance support in the US. As a primary sub-tier contractor, M3 Technology has provided a range of services to customers and end users.

- Kanban, Just-In-Time Programs & other Inventory Management Solutions
- Kitting Operations
- Supply Chain Oversight and Management
- Direct Supply of Parts and Components
- HazMat Handling, Packaging, Shipping and Disposal Services
- Coordination of Maintenance, Repair, and Overhaul Efforts
- Quality Control and Import/Export Compliance Management
- Dedicated Customer Service Support and Product Reliability Programs
- Commercial & Military Packaging

PRODUCT QUALITY

Through the use of authorized supply chain sources, M3 Technology is positioned to offer only the highest quality product in service of its customers and end users. Certified to AS 9120, ISO 9001, and FAA-0056C, the Quality Team of M3 Technology has the experience and know-how to ensure that only fully compliant material is accepted for delivery to the front lines and other points of use. These layers of Quality Control guarantee the supply of authentic parts and components, and provides certainty that equipment offered will meet all requirements.

CONTINUOUS IMPROVEMENT & COMMITMENT TO EXCELLENCE

M3 Technology has created a system and processes dedicated to exceeding customer expectations each day. Every department, and every individual at the company is empowered and directed to identify areas for improvement. The company utilizes a variety of methods and dedicated teams to carry out and implement improvement efforts. These range from innovative supplier base monitoring programs to dedicated root cause analysis of rejections and failed product.

These steps and the 15 years of experience combine to allow M3 Technology to offer the very best in service. For each member of the team, a dedication to customer service and a desire for long term customer satisfaction drives all activities. In support of our customers and end users, M3 Technology stands ready, willing, and able to serve.
